The diagram illustrates the chassis of a vehicle with various components labeled for weight measurement. At the top, two boxes labeled "WEIGHT grams" point to the front suspension and steering assembly. At the bottom, four boxes labeled "WEIGHT POSITION grams" (each with five circles below it) point to the front and rear suspension and axle assemblies. On the left and right sides, vertical double-headed arrows labeled "mm" and "TRACK WIDTH" indicate the measurement of the track width. Arrows also point from the "WEIGHT POSITION" boxes to the specific weight measurement points on the chassis.
