

NATRIX 748 TC

REMARKS
Alu radio mount / 10g on radio box V3 diffs / new pulley set / side brace New Big bore dampers /

The diagram illustrates the chassis of a vehicle with various weight components and their positions. Key measurements and labels include:

- TRACK WIDTH:** Indicated on both sides as 200 mm (left) and 199 mm (right).
- WEIGHT grams:** Labels pointing to specific components like the engine, transmission, and rear axle assembly.
- WEIGHT POSITION:** Labels pointing to the front and rear wheel areas, each accompanied by a row of five circles representing weight distribution. The front wheel area shows one filled circle on the left, and the rear wheel area shows one filled circle on the right.
