

VIPER 990

NEW OPTIONALS
**SHOCKMOUNT
SET FR FLEX**
S990 #903857

**The new optional
front shockmounts
allow for more flex.**

The traditional shock bracket is replaced by 2 separate mounts. Due to the use of shims, the angle of the shocks can also be adjusted in smaller steps, allowing for an even better suited setup.

The 2 separate mounts can be connected with a bracket to give more stiffness, especially on high traction tracks.
